## GODREJ INTERIO KITCHENS: OUR PRESENCE

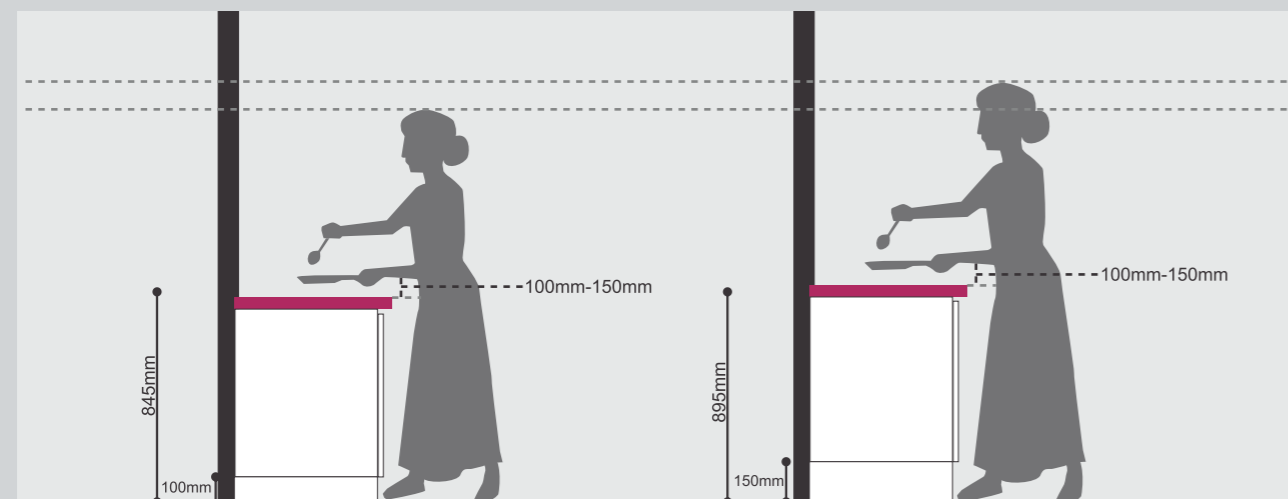

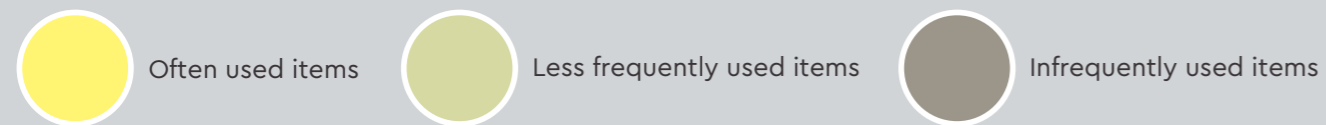

Our 150 stores in India give you complete access to the wide range of kitchen solutions. All of these quality kitchen products are manufactured across facilities at Vikhroli, Shirwal, Khalapur, Haridwar, and Bhagwanpur as per Godrej Interio's standards.

# KITCHEN PLANNING

With years of research & development on the ergonomics of kitchen, Godrej Interio has meticulously identified kitchen sections based on their ergonomically correct levels to effectively aid in storage planning.

Plan storage items in ergonomically correct levels

Backed by years of research, performed by expert designers on Indian anthropometric data, and cooking habits, our range of kitchen designs has comprehensive solutions for all your kitchen problems.

# KITCHEN WORK TRIANGLE

The Kitchen Work Triangle is a concept used to determine efficient kitchen layouts that are both aesthetic and functional. The primary tasks in a home kitchen are carried out between the cooktop, sink, and refrigerator. These three points and the imaginary lines between them make up what kitchen experts call the Work Triangle. The idea is that when these three elements are close (but not too close) to one other, the kitchen will be easy and efficient to use, cutting down on wasted steps.

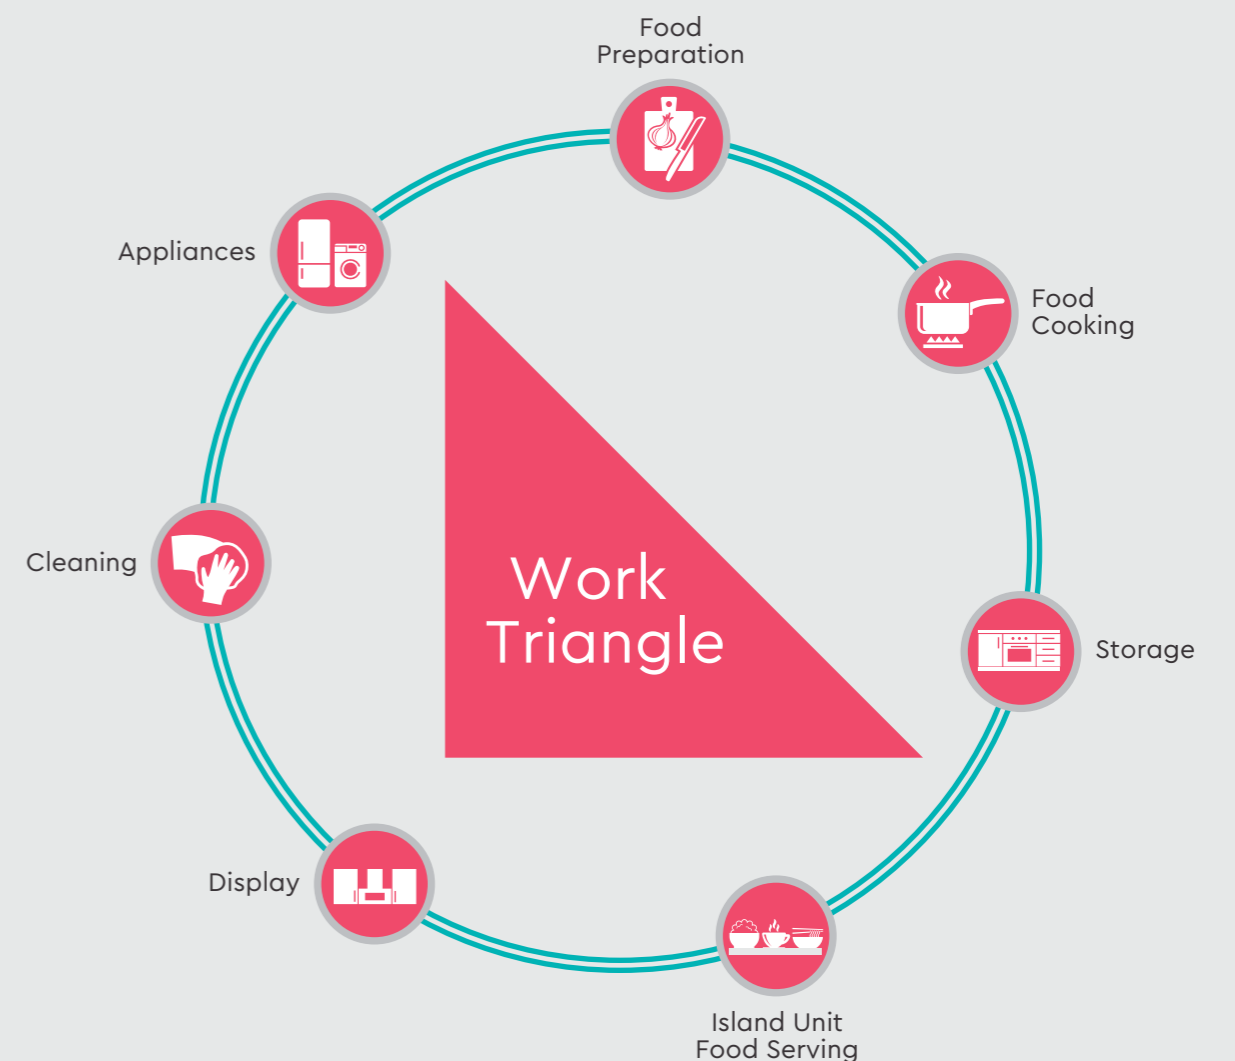

## The 26 Feet Rule

To ensure maximum efficiency, the Work Triangle perimeter should be at least 12 feet but not exceed 26 feet.

## Work Center

It defines allocation of supply for specific application like baking supplies should be closest to the oven, clean-up materials close to the sink, and the snack items next to the microwave.

# THE MAP OF KITCHEN CONVENIENCE

By strategically allocating every kitchen space for specific kitchen needs, Godrej Interio is able to conceptualise kitchen designs that are ideal in making optimum utilisation of space.
